Intellectually-curious former educator turned software developer with experience from an immersive bootcamp, multiple projects, self-study, and internships with startups in Vietnam and China. Currently completing DigitalCrafts 16-week full stack web development bootcamp. Available for new work in October 2018 and seeking challenging web development positions to leverage new skills.

EDUCATION

Full-Stack Web Development Immersive, DigitalCrafts - Atlanta, GA (expected Oct 2018)

- DigitalCrafts is a 16-week immersive coding bootcamp with a focus on full-stack JavaScript including Node.js and React.

BA, Political Science, Georgia State University - Atlanta, GA (2014)

Completed multiple Udemy and Coursera courses (2017)

PROJECTS

BuddyUp (Live site: github.com/achoi2/Buddy-up)

Sept 2018

BuddyUp is a web app that lets users connect with others that have similar interests using the Meetup API. Created a text box that displays rendered data from the Meetup API. Built app using Node.js, HTML, and CSS, and helped deploy app to AWS.

Tonely (Git repo: github.com/achoi2/Tweet-Sentiment-Analysis)

Aug 2018

Tonely is a sentiment analysis tool and web app that analyzes the tone of a Tweet to help users achieve a consistent tone. Once the tweet is analyzed it can be saved in a database for review by others. Tonely uses the IBM Watson API, JavaScript, HTML, CSS, and a Firebase backend.

CoffeeShop (Git repo: github.com/oscarjes/coderschool-coffee)

Dec 2017

CoffeeShop is a model e-commerce web app that allowed users to order coffee and other items in real-time. Collaborated with partner to come up with features and enhancements. Features include menu display, shopping cart with subtotals, and a checkout screen. Built using React.js and the Stripe API for payments.

INDUSTRY EXPERIENCE

Teaching Assistant, Coderschool - Ho Chi Minh City, Vietnam

Apr 2018 - May 2018

Coderschool is a bootcamp for software developers.

- Served as a test student to complete curriculum and provide feedback on difficulty and areas for improvement.
- Teaching Assistant for an introductory front end course.

Project Management Intern, Lipsync - Beijing, China

May 2016 - July 2016

Lipsync is a startup that was building a translation app for iOS and Android.

- Conducted tests to measure the app's call quality and wrote reports.
- Collaborated with a translator to make calls in real time.

SKILLS

JavaScript, Node.js, Express.js, React.js, Redux, HTML, CSS, AWS, PostgreSQL, GitHub
