ANDREW CHOI

Full Stack Web Developer, Atlanta GA

Former educator turned software developer. Has over three years experience teaching abroad. Tech experience includes interning for startups in Vietnam and China. Enjoys building applications. Currently attending DigitalCrafts, a full time 16 week coding bootcamp.

SELECTED WORK

Tonely

August 2018

Git repository: https://github.com/achoi2/Tweet-Sentiment-Analysis

Tonely helps our users achieve a consist tone in their tweets. Cooperated with teammates to build app through github. Tasked with implementing firebase to use as the backend for our application.

Spotify Clone

April 2018

Live site: https://achoi2.github.io/Spotify-Clone/

Created Spotify Clone to help students in a front-end course. Was made entirely by me. Used HTML and CSS. Enabled a fixed nav bar. Included a subscription box so users can view prices.

CoffeeShop

December 2017

Git repository: https://github.com/oscarjes/coderschool-coffee

CoffeeShop was created using React.js. Worked with partner in coming up with ideas and features. Used the Stripe API for payments. Created a menu display for food items. Allowed users to add items in real time.

TECH EXPERIENCE

Coderschool, Ho Chi Minh City, Vietnam — *Teaching Assistant*

April 2018 - May 2018

Assisted in teaching an introductory front end course. Helped the lead instructor with developing the course curriculum.

Lipsync, Beijing, China —*Project Management Intern*

May 2016 - July 2016

Conducted tests to measure call quality of the app. Collaborated with a translator to make calls in real time.
